Year 3 and 4 Home Learning Maths Plan – Week 1st-5th March 2021

Monday 1st March **Recap: Equivalent Fractions (1)**		Tuesday 2nd March **Recap: Equivalent Fractions 2**		Wednesday 3rd March **L.O: to recognise and calculate equivalent fractions**		Thursday 4th March	
Today we're going to investigate the idea of 'Equivalent Fractions' for the first time. We have already talked a little bit about equivalent fractions during our lessons last week. I wonder whether you can remember what they are? Watch and listen to the teaching video really carefully. Here's the link to it: https://vimeo.com/504289061		This will be our second recap activity on equivalent fractions and the work follows on from yesterday's lesson so you might find it useful to have your sheet from yesterday with you. Here is the teaching video link: https://vimeo.com/504316253		Today, we will be putting into practice the skills that we covered on Monday and Tuesday. This activity will probably seem harder than Monday and Tuesday's one, but use your work from the last few lessons to help you. Don't forget to ask if you get stuck. Here's the video link: https://vimeo.com/504472462		**There's no maths lesson activity for today as it is World Book Day. Enjoy!**
